Installation
Create Database

Create a new MySQL database and new user with full rights to the database.
Check with your server's control panel documentation for details on how to create databases on your system..

Upload files

Unzip the iScripts PrintLogic full install zip file with paths in your computer. Upload all files maintaining the directory structure.

OR

Upload theiScripts PrintLogic full install zip file and unzip on your server. If you do this, be sure your files are owned by the user who owns the site.

Run the install script

Open a new browser window. Surf to
http://[your_ iScripts_PrintLogic_domain]/install/install.php (Substitute your domain name for [your_ iScripts_PrintLogic_domain])
Fill out the following sections:-

1) File Permisions

PrintLogic requires that some of the folders have write permission. Please provide write permission for the listed files manually or provide the FTP username / password and the application will do it for you.
Once the above information has been entered, click on "Next" to goto step 2

2) Database Details

Database Name – enter the name of the database
Database User – specify the database username.
Database Password – database password.
Host Name – specify the hostname here

3) Site Details

Site Name – specify your site's name

License Key – enter your license key

Click on "Next" to complete the installation.

4) Administration Details

Admin Email - enter the administrative email address

Click on "**Continue** " button.

If the installation is successful you will get the following message:-

Congratulations! The Installation Process was completed successfully!

In addition, the link to the administrative portal along with the login credentials will be displayed.
